

## ***User actions in the demo version of***

### ***MagnaView***

- *The window*
  - MagnaView demo's are best viewed full screen. Resize the MagnaView window the usual way.
  - The areas for *Legend*, and *Mouse panel* can be resized by means of clicking on the borders, holding the mouse button down and dragging.
- *Moving the overlay*
  - Move the mouse over a view (P.S. the legend will change as well).
- *Selecting views*
  - Select a view using the pull-down menu.
  - Go to the next view with ] (keyboard) or with the  button.
  - Go to the previous view with [ (keyboard) or with the  button.
- *Zooming in and out*
  - Zoom in on a part of a view by double-clicking.
  - Zoom out by clicking the  button.

- *Masking levels of detail*

- Make more detail visible with the  button.
- Mask details with the  button.

- *Selecting nodes*

- Ctrl + left mouse click to select a node.
- Ctrl + left mouse click in a margin to select a group of nodes.
- Press left mouse button and drag your mouse over a group of nodes. That group is selected now.
- Choose the  button to create a selection by choosing the value or an attribute or by means of free text string.
- Choose the  button to inverse the selection; nodes that are selected become unselected vice versa.
- Press *esc* (keyboard) or the  button to unselect all nodes.

- *Filtering nodes*

- Choose the  button to make all visible nodes invisible vice versa.
- Choose the  button to hide all non-selected nodes.
- Choose the  button to hide all selected nodes.
- Choose the  button to make all nodes visible.

- *Other possibilities*

- Print a view by clicking the  button or *File / Print*.
- Save a view as an image file by clicking the  button or *File / Save as image*.
- Copy a view to Windows' clipboard by *Views / Copy to clipboard*.
